SUMMARY

I am an information technology professional with expertise in web application development, database management, and systems integration. Experienced in building efficient and user-friendly digital solutions, I am accustomed to working both in teams and independently. I am committed to continuous learning and developing my skills to make the best contribution to the organization.

EXPERIENCE

Leader - development team   **July 2025 - Present**
- Led a team of four developers to design and maintain the organization's website.
- Coordinated project workflow, delegated tasks, and conducted regular code reviews.
- Developed front-end and back-end features using [React, Node.js, MySQL] to ensure scalability.
- Optimized website performance, reducing average load time by 25%.
- Successfully launched two large web projects, each completed on time and within budget.

Bendahara - Organisasi Siswa Intra Sekolah   **2024 - 2025**
- Prepared monthly financial reports.
- Oversaw the allocation of funds for more than three events, all completed within budget.
- Implemented a transparent cash flow tracking system to enhance accountability.

Vice Chairman - Ekstrakulikuler Robotika   **2025 - Present**
- Assisted the President in leading a club of over 20 members, ensuring smooth project coordination and meetings.
- Organized three robotics workshops and prepared the team for interschool competitions.
- Supported members in developing technical skills and teamwork.

EDUCATION

SMK TI BAZMA - Sistem Informatika Jaringan & Aplikasi   **Aug 2023 - Sekarang**

PROJECTS

BEST(Bazma Excellent Showcase Of Talents) (React, Node Js, Express Js, MySql)   **July 2025**
- BEST is a digital platform that makes it easy for alumni and students of SMK TI BAZMA to showcase their portfolios online. Their best work is now easily accessible to the public, industry, and those seeking to better understand the potential of the younger generation.

Bazma Cipher (React Js, Tailwind CSS)   **Oct 2024**
- Bazma Chiper is a web-based platform designed to encrypt and decrypt text messages. Using a special cipher-like encoding system, Bazma Chiper helps maintain information confidentiality and prevent unauthorized access. This website can be used as a learning tool for cryptography and as a practical tool for protecting digital messages.

Platform Berbagi (PHP, Laravel, Tailwind CSS)   **Aug 2025**
- The website berbagi.smktibazma.com is a digital platform to promote transparency and accuracy in the distribution of social assistance. Through this system, recipients can be verified using the QR code printed on the coupons they distribute, reducing the potential for errors or data misuse.
